I specialize in the analysis of technology product strategies, specifically, new B2B services and products in the pre-launch phase. France Telecom recently retained me to perform sector due diligence prior to launching development efforts for automotive supply chain and brand monitoring ASP service sectors.

At OpenLink Software, I provided compositional services comparable to much larger analyst practices. My analysis covered differential competitive sector adjudications and market intelligence, mostly delivered as white papers. OpenLink used these major monographs as resource collateral for internal, external, and partner communication outreach purposes. All of the foregoing is a gratifying acknowledgment of more than thirty years total working across multiple technical disciplines.

I have practical experience as well: At Interstate Automotive, I created a fleet services-dispatch system; the system was J2ME / Nextel centric, the most common mobile platform for the services trade. The ThruDispatch system included a unique XSLT Forms/fax gateway. This type of technical, hands-on experience, sets me apart from other analysts.

I also created seminal interactive e-publishing products during the heyday of the 90's digital boom: the TekDisc interactive technical manual, and the multi-user authoring/content management system, Nereus.

My reputation as a "trends spotter, one who makes the right call at the right time, delivering cogent written and oral advice to management", has served me well in creating value, fostering partnerships, and creating the groundwork for new products and innovation.

"Mr. Wilensky is a renaissance man for our technological age." Dale Hardy, Exec.VP., Vicom Multimedia

Core Strengths:

- Technology Sector Strategic Analysis
- In-depth, ground up understanding of electronics, computing, and advanced software systems
- Technical Product Services Industry Vertical; product planning, training, and management
- Stellar trade writer, speaker, presenter (impressive portfolio)
- Product/Market Evangelism and Business/channel development, trade group, and media relation

bizQuirk Product Sector Strategies, San Mateo, CA 4/15/2007-Current.
